Arithmetic (from the Greek $\alpha\rho\iota\theta\mu\acute{o}\varsigma$, arithmos, "number" and $\tau\epsilon\chi\eta$ [tĕkĕchne], "art") is a branch of mathematics that consists of the study of numbers, especially the properties of the traditional operations on them—addition, subtraction, multiplication and division. Arithmetic is an elementary part of number theory, and number theory is considered to be one of the top-level ...

Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children and youth. Play also offers an ideal opportunity for parents to engage fully with their children. Despite the benefits derived from play for both children and parents, time for free play has been markedly reduced for some children.

It is hard to say because it depends on various factors (1) Are you from a target school (your MBA)? (2) How do you present yourself? (3) What are your valuation skills/experience? etc So it's a 50/50 chance depending on the above.

Investment Banking Math: It's Not Rocket Science

Preface The theory of complex multiplication is not only the most beautiful part of mathematics but also of all science. D. Hilbert's Abelian varieties with complex multiplication are special in that they have the largest possible endomorphism rings.

Vital articles are lists of subjects for which Wikipedia should have corresponding featured-class articles. They serve as centralized watchlists to track the status of Wikipedia's most important articles. There are approximately 1,000 articles listed on this page, which constitutes Level 3 of the vital articles list. All articles from higher levels are also included in lower levels.
