"Gravy" foods are often high in carbohydrates due to the starch thickeners (e.g., rice flour) that are sometimes used to make the gravy. Some "gravy" is made with gums (e.g., guar or xanthan) and those substances are soluble fibers (which may actually promote intestinal health) and do not contribute to the carbohydrate fraction in the same way as starches do.

Organic food production is a self-regulated industry with government oversight in some countries, distinct from private gardening. Currently, the European Union, the United States, Canada, Japan, and many other countries require producers to obtain special certification based on government-defined standards in order to market food as organic within their borders.

2. The origins of Native Americans and their food. It is commonly believed that the first Native Americans crossed from the Old World into the New World across the Bering Land Bridge that joined Siberia to Alaska at least 15,000 years ago, but disappeared shortly thereafter. Although the passage of time renders it impossible to know for certain how, when, or why the Asian ancestors of the ...
